# TEMPLATE INSTRUCTION

## HOW TO PREPARE YOUR ARTWORK

Follow the steps below and keep all existing template elements at their original size and position.

### 1 OPEN THE TEMPLATE

Open the file in Adobe Illustrator. Do not change the page size, scale the template or move any technical elements.

### 2 USE THE ARTWORK LAYER

Place all design elements in the existing ARTWORK layer. Keep the Base and Template layers unchanged. Do not move or resize any template elements.

### 3 ADD THE REQUIRED BLEED

Extend backgrounds, colours and images to the cyan artwork outline . This provides the required bleed around the cutting line.

CYAN: ARTWORK SIZE — MAGENTA: CUTTING LINE

### 4 POSITION IMPORTANT CONTENT

Keep logos, text and other essential elements comfortably inside the dashed magenta cutting line . The bleed area is not guaranteed to be visible.

### 5 CHECK THE ARTWORK

Use CMYK colours and vector artwork where possible. Raster images must be at least 300 dpi at final size. Add relevant Pantone colour references when required.

### 6 PREPARE THE FINAL FILE

Convert text to outlines or include the fonts. Include all linked files. Save and supply the artwork as an AI, EPS, PDF or SVG with all layers intact.

**FINAL CHECK** ORIGINAL SIZE | CMYK | 300 DPI | LINKS INCLUDED | TEXT OUTLINED
